Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5, 8-12, 14-15, and 18-20 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent Number 6,016,504 to Arnold et al.

Arnold discloses a method for ordering merchandise over a communication network among a plurality of merchandise providers from a plurality of order terminals, each of the order terminals being associated with one of a plurality of business entities (column 4, lines 7-14), with maintaining information with respect to business relationships between the merchandise providers and the plurality of business terminals (column 6, lines 13-17), and providing an offering at one of the plurality of order terminals based on the business relationships associated with one or more of the order terminals (column 5, lines 46-55), as in claim 1.

Arnold also discloses a system for facilitating ordering of merchandise over a communications network by a user among a plurality of merchandise providers from a plurality of order terminals, each of the order terminals being associated with one of a plurality of business entities (column 4, lines 7-14), comprising a control system (column 6, lines 13-17) for maintaining information with respect to business relationships between the merchandise providers and the plurality of business entities, the control system having a communication

device (column 4, lines 2-7) for communicating with the plurality of order terminals over the communications network, the order terminal being used by the user to display an offering based on the business relationships associated with the order terminal, as in claim 10.

Arnold further discloses the offering provides a subset of merchandise providers from a plurality of merchandise providers (column 5, lines 41-46), as in claims 2 and 11, wherein the subset comprises two or more merchandise providers, as in claims 3 and 12, as well as the offering being displayed in a presentation format that is also based on the business relationship (column 5, lines 44-46), as in claims 4 and 14.

Arnold additionally discloses the order terminal is a appliance capable of accessing the Internet (column 5, lines 41-42), as in claims 5 and 15, as well as the business relationships include friendly, neutral, and hostile relationships (column 6, lines 22-26), as in claims 8 and 18, and the business relationships are maintained in a directory by a service manager (column 6, lines 13-15), as in claims 9 and 19.

Arnold furthermore discloses a computer storage program for implementing the method (column 5, lines 24-27) where the program has to be stored in a computer or server on the Internet, as in claim 20.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 6-7 and 16-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Arnold, as applied above, in view of U.S. Patent Number 5,950,173 to Perkowski.

Arnold discloses the invention substantially as claimed. However, Arnold does not disclose the location of the terminals in relation to the customer. Perkowski teaches of a computer used to access a virtual sales agent (column 17, lines 36-39), in which can be placed in a retail store (column 18, lines 7-12) in the analogous art of Internet commerce and web based shopping outlets for the purpose of accessing public locations where consumer-products are being sold. It would have been obvious to one with ordinary skill in the art at the time the invention was made to incorporate the method and system of Arnold into a kiosk type display device, as taught by Perkowski in order to place the "virtual outlet" in locations where related consumer product are to be sold.

Response to Arguments

Applicant's arguments filed November 19, 2003 have been fully considered but they are not persuasive. Arnold discloses an outlet in which a relationship is established and maintained with a merchant, or merchandise provider, by interacting with the merchant via an image provider or Web page. A customer would, inherently, have to access the Web page by way of the Internet, where the customer would have to use an Internet appliance, or terminal. Once the customer reached the Web page using the terminal, a business relationship could be developed, and a business transaction can take place between the customer and the merchant. Thusly, Arnold does in fact disclose a business relationship between a customer and a merchandise

Art Unit: 3676

provider, where the customer would have to use a terminal to place a transaction with the merchandise provider, through an image provider.

The examiner would like to further point out that the applicant does not claim a relationship between a customer and an image provider, yet the applicant has addressed this as an argument, the examiner addressed this issue on its merits and is disclosed above.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
